

5174 – 01/07/10

To Our Patients:

On behalf of the physicians and staff of Women's Care Florida I would like to thank you for choosing one of our physicians or other caregivers to provide your health care. As you are no doubt aware, the rapidly increasing cost of professional liability insurance has contributed significantly to the rising cost of health care and has forced many physicians to either raise their fees, limit their practice, or leave the state of Florida to practice in other states that have more affordable professional liability insurance, threatening Florida citizens access to medical care. Many obstetrician-gynecologists who continue to practice in Florida are currently unable to afford professional liability insurance and practice without such coverage.

In order to offer the liability coverage that you, as our patient, deserve, Women's Care Florida, in partnership with our professional liability insurance carrier, First Professionals Insurance Company (FPIC), now has a binding arbitration program to settle all professional liability claims. Through this arbitration program, you as well as our physicians, will benefit from a more prompt and efficient method of claims settlement in the unlikely event that such a claim is necessary.

You will learn more about this program at your upcoming visit or you may visit our website at www.WomensCareFL.com and click on the binding arbitration link. By choosing to access the information online, you will save valuable time at your upcoming visit. You will be asked to verify the fact that you have reviewed the video at your upcoming visit.

The physicians and other caregivers of Women's Care Florida look forward to a long term professional relationship with you and look forward to your upcoming visit to one of our divisions. Attached please find a list of current physicians who are either partners or employed by Women's Care Florida.

Sincerely,

Robert W. Yelverton, M.D.
Chief Medical Officer
